

NRM Dairy Feeds

FUEL YOUR HERD WITH THE RIGHT FEED

To meet the needs of the New Zealand dairy cow, NRM has formulated a range of premium dairy feeds to balance typical forages being fed in New Zealand.

Create a feed programme that works for you

No two herds are the same, so our bulk NRM Dairy Blends and pelleted dairy Feeds have been developed to give you choice and flexibility in the way you feed your herd.

Rather than a bulk standard feed, you can choose what goes in by way of additives and modules based on your budget and your herd's needs, to keep them healthy, fertile and as productive as possible.

NRM Bulk Dairy Blends

More than just Palm Kernel Extract, NRM Dairy Blends are packed with extra nutrition, vitamins and minerals to give your cows the sustenance and boost they need.

The Range

Available in three options, Basic, Peak & Prestige. A seasonal Summer blend is also available.

Specifications

	NRM Dairy Blends		
	Basic	Peak	Prestige
Starch %	14	17	30
ME (MJ/kg)	12.7	12.7	12.8
NDF %	45	42	31
Protein %	14.5	14	12
Bypass fat %	0	1	1.5

Can be fed in conjunction with pasture at the rate of 4 kg/day

Additives

We can also add supplements like Bovatec® 0.375kg/t, Magnesium 15kg/t and Zinc 3kg/t into your compound feed. It's a simple way to address any seasonal herd health issues.

Note

Not all 6 blends from each site are suitable for silos - please contact NRM to discuss.

NRM Dairy Feeds

FUEL YOUR HERD WITH THE RIGHT FEED

NRM Bulk Dairy Pellets

Give your herd all they need to perform at their peak with bulk Dairy Pellets from NRM.

Rather than a bulk standard feed, options are available to suit a wide range of farming systems, herd requirements and budget situations.

The Range

The NRM Compound range encompasses a Standard, a Premium and an Elite base formulation that can be customised to include a variety of performance modules.

This unique 'mix and match' principle allows you to target on farm issues around production, fertility and health.

Specifications

	NRM Bulk Pelleted Feeds		
	Standard	Premium	Elite
Starch %	18	30	45
ME (MJ/kg)	12.5	12.5	12.5
NDF%	45	35	20
Protein %	15	12.5	11.5
By-pass fat%	0	1	2

Can be fed in conjunction with pasture at the rate of 4 kg/day

Additives

We can also add supplements like Bovatec® 0.5kg/t, Magnesium 20kg/t and Zinc 4kg/t into your compound feed. It's a simple way to address any seasonal herd health issues.

Performance

NRM's performance modules have been designed in cooperation with Provimi, one of the world's leading producers of animal nutrition products.

Modules

Production Module

NRM's Production Module improves dairy cow's ability to metabolise protein efficiently. The end result is an increased supply of metabolisable protein with an energy sparing effect.

Health Module

Persistent health disorders like mastitis and hoof problems can be very costly on dairy units. The Health Module enhances the antioxidant status of cows and thereby improves the immune status.

Fertility Module

Dairy cow fertility should be a key focus area for farmers looking to improve on-farm profitability. NRM's Fertility Module combines a range of comprehensive feed concepts to improve liver function and protein metabolism and in turn, improves the reproductive performance of your herd.
